

Cyprus Property Price Index Q1 2016 Prices as at 31/03/16

This is the twenty-sixth publication of RICS' Cyprus Property Price Index, a quarterly price and rental index which is based on methodology produced by the University of Reading, UK. The Index tracks property and rental prices across all districts and main property types.

Across Cyprus, residential prices for both houses and flats increase by 1.5% and 1.2% respectively, with the biggest increase being in Famagusta 4.1% for flats and Paphos (5.6% for houses). Values of retail properties fell by an average 0.5%, while offices and warehouses increase by 1.5% and 1.2% respectively.

Compared to Q1 2015, prices dropped by 0.2% for flats, 1.3% for retail and 2.3% for warehouses. An increase of 0.6% for houses and 0.7% for offices was noted.

Introduction & Commentary

During the first quarter of 2016 the Cyprus economy showed some signs of stability, with the economy's performance being better than expected and tourism mildly outperforming forecasts. Unemployment remained at high levels, on a downtrend to ca 13% (from the high levels of 17%), and discussions were on going on the implementation of the foreclosure bill.

Given prevailing economic conditions and the turbulence in Cyprus' banking system, there were relatively few transactions during the quarter although volume was higher on a year on year basis. Local buyers in particular were the most discerning as unemployment and high debt for locals maintained lack of interest. Furthermore, those interested are trying to access bank-finance.

Market Capital Values

The Property Price Index has recorded increases in almost all cities and asset classes, with significant increases being recorded in Paphos and Famagusta area, whilst other cities are progressively bottoming out.

Market Rental Values

Across Cyprus, on a quarterly basis rental values increased by 3.6% for apartments, 1.8% for houses, 0.2% for retail, 0.4% for warehouses and office rents increased by 0.6%.

Compared to Q1 2015, rents increased by 4.2% for flats, 2.4% for houses and 2.4% for offices. Retail and warehouses dropped by 3.2% and 2.1% respectively.

The majority of asset classes and geographies are bottoming out, with areas that had dropped the most early on in the property cycle e.g Paphos, Famagusta and Larnaca are showing some signs of price stability.

Appraisal based initial yields

At the Q1 of 2016 average gross yields stood at 4% for apartments, 2.0% for houses, 5.2% for retail, 4.3% for warehouses, and 4.4% for offices. The parallel reduction and/or stabilisation in capital values and rents is keeping investment yields relatively stable and at low levels (compared to yields overseas). This suggests that there is still room for some re-pricing of capital values to take place, especially for properties in secondary locations.

Index parameters and methodology

Methodology

The methodology underpinning the RICS Cyprus Property Price Index was developed by the University of Reading, UK. The report is available upon request at ricscyprus@rics.org

Coverage and Variables Monitored

The RICS Cyprus Property Price Index monitors the urban centres of Nicosia, Limassol, Larnaca, Paphos and Paralimni-Famagusta. The Index only tracks prices in Republic of Cyprus' government controlled area and not in the occupied North.

In each of these centres, the index monitors the Market Value and Market Rent, as defined in the RICS Red Book, across the four main property sectors – office (CBD), retail (high street), industrial (warehouse) and residential (houses and apartments).

Recognising that there are sub-districts within these urban areas which operate and behave in a varying manner, a number of these is monitored in order to derive the composite index for each category per urban area.

The information provided in this publication is based on the average price and rent of the sub-districts monitored per urban centre per sector. The complete list of these sub-districts can be found in the University of Reading's report which is available upon request at ricscyprus@rics.org

Nature of Notional Buildings

The RICS Cyprus Property Price Index monitors hypothetical or notional buildings, each having specific characteristics. Details of these hypothetical properties are provided in the University of Reading's report.

The provided price per sqm is based on the Gross External Area of the property (as defined in the RICS' Code of Measurement Practice 8th Edition), which includes the living area and covered verandas but excludes common areas.

Frequency

The index is produced on a quarterly basis.

Monitoring Process

The estimation of price levels is carried out by accredited RICS property professionals who are active in the relevant markets.

Contributing professional bodies

Profile of RICS

RICS is a global professional body. We promote and enforce the highest professional qualification and standards in the development and management of land, real estate, construction and infrastructure. Our name promises the consistent delivery of standards – bringing confidence to the markets we serve. The work of our professionals creates a safer world: we are proud of our profession's reputation and we guard it fiercely. RICS in Europe is based in Brussels and represents 17 national associations, with over 8,150 members in Continental Europe. Visit www.rics.org for more information.

Profile of ΣΕΕΟΚΚ

The Cyprus Association of Quantity Surveyors and Construction Economists (ΣΕΕΟΚΚ) is the association that represents Chartered Quantity Surveyors and Quantity Surveyors whose main area of work is in Cyprus and they permanently live in Cyprus. Visit www.seeokk.org for more information.

Profile of Cyprus Association of Valuers and Property Consultants

The Association was founded in 1972. At present there are about 100 members registered with the Association and concurrently with the Cyprus Scientific and Technical Chamber (CSTC), which is the official body that regulates the Valuation Profession in Cyprus. Our members are also members of RICS and are operating in accordance with the International Valuation Standards and the RICS Appraisal and Valuation Manual (Red Book).
